

Rising Beyond Borders

Website Specification — Document 04

OUR WORK — MASTER SPECIFICATION

Document 04 defines the Our Work experience from first principles. It creates a clear relationship between RBB's four program areas and the individual projects/programs that may later be published underneath them.

Source rule: The supplied annual report establishes four program areas: Education, Health & Wellbeing, Livelihoods and Community Support. It does not provide a complete verified project catalogue, project outcomes, locations or detailed intervention descriptions. Those gaps remain explicit.

Important: Do not use inherited country campaigns or project claims simply because they exist in the current codebase.

1. Our Work Goal

The Our Work experience should answer:

- What areas does Rising Beyond Borders work in?
- What does each area mean?
- What programs or projects belong to each area?
- What can a visitor learn about a specific project?
- How can a visitor move from understanding the work to taking action?

The section should communicate the breadth of RBB's work without inventing depth that RBB has not supplied.

2. Our Work Information Architecture

Level	Route	Purpose
Overview	/work	Introduce the four program areas and relationship to projects.
Program	/work/education	Explain Education.
Program	/work/health-wellbeing	Explain Health & Wellbeing.
Program	/work/livelihoods	Explain Livelihoods.
Program	/work/community-support	Explain Community Support.
Projects	/work/projects	Directory of verified projects/programs.
Project detail	Future /work/projects/:slug	Detailed verified project information.

3. Our Work Overview — /work

Hero: Our Work

Direction: Introduce RBB's focus on empowering communities through sustainable solutions.

Primary content: Education; Health & Wellbeing; Livelihoods; Community Support.

Secondary: Featured/verified projects only if project data exists.

CTA: Explore Projects → /work/projects

Important: Never create fake project cards to fill the layout.

4. Reusable Program Template

Section	Purpose
Program Hero	Name, concise approved description, visual.
Why This Matters	Context supplied/approved by RBB.
What We Do	Verified activities/interventions.
Featured Projects	Only verified projects in the program.
Impact	Only approved program metrics.
Stories	Approved stories connected to the program.
Get Involved	Relevant action pathways.

5. Education

Confirmed: Education is one of the four program areas.

Safe current description: Access to quality education and skill-building opportunities.

Do not invent: schools, students, scholarships, countries, curriculum, graduation rates or outcomes.

Missing: detailed program description, projects, locations, impact and imagery must be supplied/approved by RBB.

6. Health & Wellbeing

Confirmed: Health & Wellbeing is one of the four program areas.

Safe current description: Improving health outcomes through care, awareness and support.

Do not invent: clinics, patients, treatments, medical outcomes, countries or health statistics.

Missing: detailed program description, projects, locations, impact and imagery.

7. Livelihoods

Confirmed: Livelihoods is one of the four program areas.

Safe current description: Sustainable livelihoods and economic empowerment.

Do not invent: jobs, businesses, training numbers, income increases, countries or beneficiary figures.

Missing: detailed program description, projects, locations, impact and imagery.

8. Community Support

Confirmed: Community Support is one of the four program areas.

Safe current description: Strengthening communities through advocacy, resources and partnerships.

Do not invent: specific interventions, locations, beneficiary numbers, partners or outcomes.

Missing: detailed program description, projects, locations, impact and imagery.

9. Projects Directory — /work/projects

Purpose: Provide a structured directory of verified RBB projects/programs.

Current source state: No complete verified project catalogue is supplied.

Empty state: Projects to be provided by Rising Beyond Borders.

Do not use inherited Gaza, Sudan, Yemen, Pakistan or other country/project content as filler.

Potential future filters, only when enough data exists: Program area, Country/region, Project status, Search.

Do not implement filters that imply a dataset exists when it does not.

10. Future Project Detail Template

Field	Requirement
Project name	Verified official name.
Program area	One of the four RBB program areas.
Location	Only if verified.
Status	Only if supplied by RBB.
Summary	Concise factual description.
Challenge / context	Approved factual context.
What RBB does	Verified activities.
Impact	Verified outcomes/metrics only.
Partners	Only verified partner names.
Images	RBB-approved assets with alt text.
Story	Optional approved human story.
CTA	Relevant action or related work.

11. Featured Work Relationship

The homepage Featured Work section and /work should use the same underlying verified project/program data where possible. Do not maintain contradictory project facts in different files.

Conceptual model: project = { id, title, program, description, location, status, image, impact, slug }

12. Content Required From RBB

Required content	Needed for
Approved description for each program	Four program pages
Program-specific imagery	Program pages
Program activities/interventions	Program pages
Verified project catalogue	Projects directory
Project locations	Project pages
Project status	Project pages

Project outcomes/metrics	Project pages + Impact
Project images	Projects + homepage
Approved stories	Projects / Stories
Partner names	Only where approved

13. What Must Not Be Invented

- Projects or campaigns.
- Countries or regions of operation.
- Beneficiary counts.
- Project outcomes.
- Medical or health statistics.
- Schools, clinics or facilities.
- Partner organizations.
- Project funding amounts.
- Project dates or status.
- Testimonials.
- Before/after impact claims.

14. UX & Visual Direction

- Make the four program areas the primary visual hierarchy on /work.
- Use one consistent reusable template for all program pages.
- Use project cards only when real project data exists.
- Do not fill empty states with generic charity stories.
- Use editorial imagery and whitespace rather than excessive card grids.
- Use filters only when the underlying dataset is large enough.
- Make every program/project card keyboard accessible.
- Keep donation CTAs contextual rather than repeated everywhere.

15. Accessibility

- One H1 per page.
- Logical H2/H3 structure.
- Program and project cards must be keyboard accessible.
- Filters must have accessible labels when implemented.
- Images need meaningful alt text.
- Do not use color alone for project status.
- Support reduced motion.
- Maintain sufficient contrast.

16. Claude Code Implementation Prompt

Attach this PDF. Documents 01–03 are already approved and implemented.

You are implementing Document 04 – Our Work Master Specification for Rising Beyond Borders. STATUS: - Document 01 – Information Architecture & Navigation: approved. - Document 02 – Homepage Master Specification: approved. - Document 03 – About Us Master Specification: approved. - Document 04 – Our Work: implement now. The attached Document 04 PDF is the source of truth. Do NOT redesign the homepage. Do NOT redesign the About page. Do NOT start Document 05. Only implement the Our Work experience described in Document 04. 1. AUDIT FIRST Inspect: - /work - /work/education - /work/health-wellbeing - /work/livelihoods - /work/community-support - /work/projects - existing project components - content/data files - routing - shared UI - responsive/accessibility patterns Reuse what is good. Do not delete reusable components unnecessarily. 2. OUR WORK ARCHITECTURE Implement/prepare: /work /work/education /work/health-wellbeing /work/livelihoods /work/community-support /work/projects Future detail may use /work/projects/:slug. Do not build a CMS. 3. /WORK Hero: "Our Work" Introduce RBB's focus on empowering communities through sustainable solutions. Primary program areas: - Education - Health & Wellbeing - Livelihoods - Community Support CTA: Explore Projects → /work/projects If verified projects do not exist: "Projects to be provided by Rising Beyond Borders." Never create fake project cards. 4. PROGRAM TEMPLATE All four program pages use one reusable template: 01 Program Hero 02 Why This Matters 03 What We Do 04 Featured Projects 05 Impact 06 Stories 07 Get Involved 08 Closing CTA Do not invent empty-section content. 5. EDUCATION Confirmed program area. Safe description: "Access to quality education and skill-building opportunities." Do not invent schools, students, scholarships, countries, curriculum, graduation rates or outcomes. Missing: "Education program information to be provided by Rising Beyond Borders." 6. HEALTH & WELLBEING Confirmed program area. Safe description: "Improving health outcomes through care, awareness and support." Do not invent clinics, patients, treatments, statistics, medical outcomes, countries or beneficiary counts. Missing: "Health & Wellbeing program information to be provided by Rising Beyond Borders." 7. LIVELIHOODS Confirmed program area. Safe description: "Sustainable livelihoods and economic empowerment." Do not invent jobs, businesses, training numbers, income increases, countries or beneficiary figures. Missing: "Livelihoods program information to be provided by Rising Beyond Borders." 8. COMMUNITY SUPPORT Confirmed program area. Safe description: "Strengthening communities through advocacy, resources and partnerships." Do not invent interventions, locations, beneficiaries, partners or outcomes. Missing: "Community Support program information to be provided by Rising Beyond Borders." 9. PROJECTS DIRECTORY Route: /work/projects No complete verified project catalogue is supplied. Do NOT invent projects. Do NOT reuse inherited Gaza, Sudan, Yemen, Pakistan or other country/project claims. If no verified projects exist, show: "Projects to be provided by Rising Beyond Borders." Potential future filters: - Program - Country/region - Status - Search Do not implement filters if there is no meaningful dataset. 10. PROJECT DATA MODEL Where useful, prepare: { id, title, slug, program, description, location, status, image, impact, partners } Only render verified fields. 11. FUTURE PROJECT DETAIL Prepare reusable architecture for /work/projects/:slug but do not build a full CMS. Future structure: - Project Hero - Summary - Context - What RBB Does - Impact - Partners - Images - Story - Related Work - CTA 12. HOMEPAGE INTEGRATION Do not redesign homepage sections. Where practical, ensure Featured Work can eventually use the same verified project/program data. Avoid contradictory project information across files. 13. CONTENT ARCHITECTURE Use a centralized data-driven model, reusing the existing architecture if available. Conceptually: programs = [{ slug, title, description, image, content, projects }] projects = [{ id, slug, title, program, description, location, status, image, impact }] Do not create duplicate systems unnecessarily. 14. NO INVENTION Never invent projects, countries, campaigns, beneficiaries, outcomes, partners, facilities, statistics, funding, dates or testimonials. Use: "Content to be provided by Rising Beyond Borders." when information is missing. 15. VISUAL DESIGN Preserve: #10437C #00ADEF #5CB85C #F5F7FA #FFFFFF #3A3A3A Satoshi. Use editorial layouts, strong typography, whitespace and approved imagery. Avoid excessive cards, fake project imagery, generic campaign blocks and excessive animation. 16. ACCESSIBILITY Maintain: - one H1 - logical H2/H3 hierarchy - keyboard-accessible cards - accessible filter labels if implemented - meaningful alt text - visible focus - sufficient contrast - reduced-motion support Never use color alone for status. 17. RESPONSIVE Test 320, 375, 768, 1024, 1280 and 1440px. No horizontal overflow. Program/project cards must stack properly. Filters must not overflow. 18. DO NOT REDESIGN FUTURE PHASES Do not fully redesign: Impact, Stories, Donate, Volunteer, Partner, Fundraise or Transparency. Only prepare correct links and reusable architecture. 19. VERIFICATION After implementation: - production build - test /work - test all four program routes - test /work/projects - test links - mobile - desktop - keyboard - accessibility - console - overflow - unsupported-claim scan - inherited third-party project/country scan 20. FINAL REPORT Return: 1. Sections removed 2. Sections retained 3. Sections created 4. Components reused 5. Components created 6. Files changed 7. Program content requiring RBB approval 8. Project content requiring RBB approval 9. Routes used 10. Production build result 11. Responsive result 12. Accessibility result 13. Console result 14. Remaining issues STOP after Document 04. Do not start Document 05.

17. Document 04 Approval Checklist

- Our Work overview follows the defined architecture.
- All four RBB program areas are represented.
- All four program pages use a consistent template.
- No projects have been invented.
- No country/project claims have been copied from inherited content.
- Project data is centralized/data-driven.

- Empty project states are polished and honest.
- Program descriptions remain source-supported.
- Responsive and accessibility checks pass.
- Document 05 has not been started.
