

Rising Beyond Borders

Document 09 — Transparency & Financials Master Specification

Purpose: Define a trustworthy transparency, reporting, financial-information and governance experience using only information supplied or explicitly approved by Rising Beyond Borders.

Primary route: /about/transparency

Legacy route: /reports → /about/transparency

Related surfaces: About Us, Get Involved, Impact, footer

Status: Master specification for Claude Code implementation

1. Document Objective

Transparency should give visitors a clear place to understand RBB's reports, financial information and governance without overstating what the supplied materials prove.

The supplied RBB Annual Report materials contain a Financial Overview for 2026 with three percentages: Programs & Services 78%, Fundraising 12% and Administration 10%. They also identify Annual Reports, Financial Information and Governance as transparency areas. The materials do not provide verified CRA registration details, audit statements, legal status, named governance members, downloadable financial documents or detailed financial amounts.

Core rule: Build the transparency architecture completely, but publish only supported financial and organizational claims.

2. Source-Confirmed Financial Content

Category	Source-supplied 2026 share	Publication treatment
Programs & Services	78%	Source-supplied figure; RBB should verify before final publication.
Fundraising	12%	Source-supplied figure; RBB should verify before final publication.
Administration	10%	Source-supplied figure; RBB should verify before final publication.

Do not add currency amounts, revenue, expenses, donor counts, audit conclusions or allocation explanations that are not present in approved RBB material.

3. Information Architecture

01 — Transparency Hero

Introduce transparency and explain what visitors can find here.

02 — Financial Overview

Present the three source-supplied percentages in a clear, contextualized visual.

03 — Annual Reports

Directory of approved annual reports, initially empty if no files are supplied.

04 — Financial Information

Area for approved financial statements, summaries or documents; no invented data.

05 — Governance

Approved governance structure/information when supplied; otherwise intentional placeholder.

06 — Accountability / How Information Is Presented

Explain available documentation without claiming audits/certifications unless verified.

07 — Related Impact

Link to Our Impact.

08 — Get Involved

Link to Get Involved / Donate.

09 — Closing CTA

Clear next step.

4. Financial Overview

Use a data-driven financial allocation component rather than hard-coding percentages in multiple places.

```
financialOverview = {  
  year: 2026,  
  items: [  
    { id, label: "Programs & Services", percentage: 78, status },  
    { id, label: "Fundraising", percentage: 12, status },  
    { id, label: "Administration", percentage: 10, status }  
  ]  
}
```

The UI should state that these are figures supplied in the RBB 2026 Annual Report materials and should be verified by RBB before final publication. Do not imply that the percentages represent audited results unless RBB supplies such evidence.

Visual treatment

- A simple accessible bar/chart/segmented presentation is acceptable.
- Every percentage must also be available as text.
- Do not use colour as the only way to distinguish categories.
- Provide a short explanatory caption.
- Do not add monetary values that are not supplied.

5. Annual Reports

Create a reusable report directory capable of supporting future RBB documents.

```
report = {  
  id,  
  title,  
  year,  
  type,  
  description,  
  fileUrl,  
  status  
}
```

- Only approved RBB documents may appear.
- If no document file is supplied, show a clear pending state.
- Do not create fake PDF links.
- Do not claim a report is audited, independently reviewed or filed unless the supplied document or RBB approval supports that wording.
- Display document year/type only when supplied.

6. Financial Information

This section should be ready for approved financial statements, summaries or explanatory documents.

- Do not invent income, expenses, assets, liabilities, donations or grants.
- Do not infer financial health from the 78/12/10 percentages.
- Do not convert percentages into dollar amounts.
- If no detailed financial documents are supplied, show a pending state.
- Future documents should be linked from the shared report/document data model.

7. Governance

The existing architecture identifies Governance as a transparency area, but the supplied materials do not provide named board members, directors, governance policies or committee structures.

- Create the page/section structure now.
- Show an explicit placeholder until approved governance information exists.
- Do not invent board members or roles.
- Do not claim governance standards, certifications or legal structures without evidence.
- Do not add biographies without approved content.

8. Legal / Registration / Audit Claims

Previous inherited site content included unsupported claims such as CRA registration. Those claims must remain removed.

- Do not state that RBB is a registered charity unless RBB supplies verified documentation and explicitly approves the wording.
- Do not state CRA registration numbers.
- Do not state that accounts are audited unless verified.
- Do not state tax-deductibility status.
- Do not state compliance/certification claims.
- Do not infer legal status from being described as a non-profit in the source materials.

9. Transparency Data Model

Create one shared source for transparency content.

```
transparency = {  
  financialOverview: { year, items, status },  
  annualReports: [report],  
  financialDocuments: [report],  
  governance: { intro, sections, documents, status },  
  accountability: { intro, links, status }  
}
```

Use internal status values such as **verified**, **pending-review** and **placeholder**. Internal editorial status must not be shown to visitors.

10. Relationship With Existing Architecture

- About Us remains the parent context for Transparency.

- Impact should link to Transparency when appropriate.
- Get Involved should use Transparency links for trust/context rather than duplicating financial content.
- Footer Organization/Transparency links should point to the canonical transparency route.
- The existing /reports route should redirect to /about/transparency.
- Do not create a second Reports hub unless RBB later needs a dedicated reporting experience.

11. Empty States

Recommended annual reports state: “Annual reports to be provided and reviewed by Rising Beyond Borders.”

Recommended financial information state: “Financial information to be provided and reviewed by Rising Beyond Borders.”

Recommended governance state: “Governance information to be provided and reviewed by Rising Beyond Borders.”

These are intentional content states, not errors.

12. Design & UX

- Continue RBB identity: #10437C, #00ADEF, #F5F7FA, #FFFFFF, #3A3A3A and #5CB85C.
- Continue Satoshi typography.
- Make financial percentages visually understandable without making unsupported claims.
- Use report/document cards with clear file type/year when known.
- Use trust-building whitespace and concise explanatory copy.
- Do not use fake badges, seals, certifications, audit icons or regulatory logos.

13. Accessibility & Responsive Requirements

- One H1 per page and logical H2/H3 hierarchy.
- Financial figures available as text, not chart-only.
- Charts/graphics require accessible text equivalents.
- Report links have descriptive accessible names and file context.
- Visible keyboard focus.
- No colour-only category meaning.
- Respect reduced motion.
- No horizontal overflow at 320, 375, 768, 1024, 1280 and 1440px.

14. SEO & Metadata

- Use unique metadata for /about/transparency.
- Do not include unsupported registration/audit claims in metadata.
- Use clear headings around financial information and reports.
- Do not index fake document URLs or placeholder downloads.

15. Implementation Constraints

- Implement Document 09 only.
- Do not redesign previous phases.
- Do not invent financial or governance information.
- Do not add fake reports or downloadable files.
- Do not add legal/registration/audit claims.
- Do not connect external document storage unless already available and approved.
- Do not add a CMS/admin.
- Do not start Document 10.

16. Claude Code Implementation Prompt

Attach this PDF to Claude Code and run the following prompt:

Implement Document 09 – Transparency & Financials Master Specification for Rising Beyond Borders.

Treat this PDF as the authoritative specification for the Transparency phase.

ROUTE

Build/rebuild:

- /about/transparency

Keep:

- /reports -> /about/transparency

GOAL

Create a trustworthy transparency experience using only source-supported or RBB-approved information.

SOURCE-SUPPLIED 2026 FINANCIAL OVERVIEW

- Programs & Services: 78%

- Fundraising: 12%

- Administration: 10%

These percentages come from the supplied RBB Annual Report materials. Implement them through one shared data source and clearly mark them internally as pending RBB verification. Do not call them audited results.

DO NOT INVENT

- currency amounts

- revenue

- expenses

- donor counts

- grants

- financial statements

- audit status

- CRA registration

- charity registration number

- tax deductibility

- legal status beyond what the source actually states

- board members

- governance roles

- certifications

- compliance claims

ANNUAL REPORTS

Create a reusable report/document data model.

If no approved report file exists, show an intentional pending state.

Never create fake PDF links.

FINANCIAL INFORMATION

Create the structure for future approved financial documents.

Do not derive monetary values from percentages.

GOVERNANCE

Create the section/page structure but show a pending state until RBB supplies approved governance

information.

DATA

Create a shared transparency data source containing:

- financialOverview
- annualReports
- financialDocuments
- governance
- accountability

Use internal status values such as verified, pending-review and placeholder.

INTEGRATION

- About Us links to Transparency.
- Impact can link to Transparency.
- Get Involved can link to Transparency.
- Footer uses the canonical /about/transparency route.
- /reports redirects to /about/transparency.

DESIGN

Use:

Deep Trust Blue #10437C

Bright Sky Blue #00ADEF

Light Gray #F5F7FA

White #FFFFFF

Charcoal #3A3A3A

Growth Green #5CB85C

Satoshi typography

ACCESSIBILITY

One H1, logical headings, text equivalents for financial visuals, descriptive report links, visible focus, no colour-only meaning, reduced-motion support.

RESPONSIVE QA

Test 320, 375, 768, 1024, 1280 and 1440px. No horizontal overflow.

VALIDATION

- production build passes
- no console errors/warnings
- no invented financial/governance claims
- no CRA/audit/registration/tax claims
- no fake reports or files
- /reports redirect works
- all internal links work
- no temporary test data

IMPORTANT

Do not redesign previous phases.

Do not connect external document storage.

Do not add a CMS/admin.

Do not start Document 10.

Do not commit changes.

After implementation return a concise report covering:

1. routes changed
2. sections created
3. transparency data/content files created or modified
4. components reused
5. components created
6. financial figures implementation
7. report/document handling
8. governance handling
9. claims/verification safeguards
10. build result
11. responsive result
12. accessibility result
13. console result
14. scans for invented/inherited claims
15. remaining issues/decisions.

17. Approval Checklist

- /about/transparency is the canonical transparency experience.
- /reports redirects correctly.
- 78/12/10 is represented from one shared data source.
- The 2026 figures are clearly treated as source-supplied/pending verification.
- No monetary values were invented.
- No fake reports or downloads exist.
- Governance remains a pending state until approved information exists.
- No CRA, audit, registration, tax or certification claims appear.
- Impact/Get Involved/Footer links use the canonical transparency route.
- Build, responsive, accessibility and console checks pass.
- No temporary test data remains.

18. RBB Content Required After Implementation

- Verification/approval of the 2026 78/12/10 figures.
- Approved Annual Report files and metadata.
- Approved financial statements or financial summaries.
- Approved governance structure and member information.
- Any approved accountability policies or supporting documents.
- Verified legal/registration/audit wording, if RBB wants such information published.

19. Phase Boundary

Document 09 establishes the transparency and financial-information foundation. It does not create unsupported financial/legal claims or fabricate documents. RBB-approved evidence can be added later through the shared data model.

Next phase after approval: Document 10 should be defined only after the Document 09 implementation report has been reviewed.
