

RISING BEYOND BORDERS

Document 10 — Our Team & Organization
Master Specification + Claude Code Implementation Prompt

Status: Implementation specification

Purpose: Define the architecture for presenting RBB's people and organizational structure without inventing any names, roles, biographies, photographs, governance claims, or operational details that have not been supplied or approved by Rising Beyond Borders.

1. Document Objective

This phase establishes the Team & Organization experience as a production-ready content architecture. The website must be able to publish approved team information later without requiring a structural rebuild. Until RBB provides approved team data, the public experience must use an intentional, trustworthy empty state rather than placeholder people.

2. Route & Information Architecture

Route	Purpose
/about/team	Primary Team & Organization page
/about	May link to the team page from the existing About Us experience

3. Page Structure

3.1 Hero

Title such as “Our Team” or “The People Behind Rising Beyond Borders”. Supporting copy must be sourced or approved by RBB. Do not invent organizational scale or claims.

3.2 Team Introduction

Short explanation of how people contribute to RBB's mission. Use approved organizational language only.

3.3 Leadership / Core Team

A reusable grid for approved leadership or core-team members. Render only records supplied and approved by RBB.

3.4 Team Members / Areas of Responsibility

Optional secondary grouping for additional approved people. The grouping model must remain flexible because the current source material does not provide a confirmed organizational structure.

3.5 Individual Profiles

Reusable profile architecture for name, role, biography, image and approved supporting details. Individual detail pages are optional and should only be enabled if RBB supplies enough approved content.

3.6 Organization / Governance Relationship

Explain the relationship between operational team information and the existing Governance/Transparency area only when RBB provides the relevant structure. Do not infer board membership, reporting lines, legal roles, or governance responsibilities.

3.7 Join / Get Involved CTA

Use the existing Get Involved system for approved pathways such as volunteering or partnership. Do not invent employment opportunities or application processes.

3.8 Closing CTA

Reuse the established site-wide CTA pattern rather than creating a new campaign claim.

4. Team Data Model

Recommended shared model:

id, slug, name, role, departmentOrArea, category, shortBio, biography, image, imageAlt, location, socialLinks, order, featured, status, approvedAt, relatedLinks.

status: draft | pending-review | approved | archived.

Rule: only **approved** records may render publicly.

5. Content & Privacy Rules

- Never invent a person, title, department, biography, location, credential, photograph, social account, or responsibility.
- Do not use stock people as if they represent RBB staff.
- Do not infer leadership or governance roles from a person's presence elsewhere on the site.
- Do not publish personal contact information unless RBB explicitly supplies and approves it for public use.
- Image alt text must describe the approved image without adding unsupported claims.
- Draft and pending-review records must remain hidden from production/public rendering.
- If only some fields are supplied, render only those fields; do not create filler copy to make a profile appear complete.
- The page must remain useful and credible when the team dataset is empty.

6. Empty-State Experience

Because no verified team roster has been supplied in the current RBB source set, the initial public page should show an intentional empty state. Suggested neutral copy: **“Our team information will be provided and reviewed by Rising Beyond Borders.”** Do not display fake names, lorem ipsum, generic stock portraits, or fictional job titles.

7. Integration With Existing Website

- About Us: add a clear route to /about/team when the page is available.
- About Us content: keep existing Mission & Vision, Values, How We Work, Transparency & Governance sections unchanged unless this phase specifically requires a link.
- Transparency & Financials: team/governance references must not imply legal or governance facts that RBB has not supplied.
- Homepage: do not add team portraits to the homepage merely to fill space. A future featured-team section can consume the same approved data model.
- Footer/navigation: use the established Information Architecture; do not create duplicate team routes.

8. UI / UX Requirements

- Use the established RBB visual system: Deep Trust Blue #10437C, Bright Sky Blue #00ADEF, Light Gray #F5F7FA, White #FFFFFF, Charcoal #3A3A3A, and Growth Green #5CB85C where appropriate.
- Use Satoshi with Arial fallback, consistent with the existing implementation.
- Reuse existing shared components where practical: PageHeader, SectionHeading, Button, ClosingCta and established card/layout patterns.
- Responsive behavior must work across mobile, tablet and desktop.
- Cards must remain readable with short or long biographies.
- Images must have stable aspect ratios and graceful missing-image behavior.
- Keyboard focus, semantic headings, alt text, contrast and reduced-motion behavior must remain consistent with the existing site.

9. Out of Scope

- No invented organizational chart.
- No invented board of directors, executives, founders, staff or advisors.
- No recruitment system or job application backend.
- No staff login or internal directory.
- No CMS/admin interface unless separately specified.
- No social-profile scraping or automatic profile imports.
- No new governance, legal, registration, audit or compliance claims.

10. Claude Code Implementation Prompt

You are implementing Document 10 – Our Team & Organization for the Rising Beyond Borders website.

CONTEXT

- This is a Canada-based NGO website for Rising Beyond Borders (RBB).
- RBB is for everyone; do not introduce religious or demographic positioning that is not in the approved source material.
- Existing phases 01-09 are already implemented and approved.
- Do not redesign or regress earlier phases.
- No team roster has been supplied/verified yet.

PRIMARY GOAL

Build the Team & Organization architecture so approved RBB team data can be added later without restructuring the page.

ROUTE

- Create /about/team as the canonical public Team page.
- Preserve the existing About Us architecture.
- Do not create duplicate team routes.

PAGE SECTIONS

1. Hero
2. Team introduction
3. Leadership/Core Team area
4. Additional Team / Areas of Responsibility area when data exists
5. Optional individual profile architecture
6. Governance relationship only when supported by approved data
7. Existing Get Involved CTA
8. Existing Closing CTA

CONTENT RULES

- NEVER invent names, roles, departments, biographies, locations, credentials, images, social links, governance roles, reporting lines, or responsibilities.
- No stock photos representing fictional staff.
- Only records with status === "approved" may render publicly.
- If no approved team data exists, show a clean empty state:
"Our team information will be provided and reviewed by Rising Beyond Borders."
- Do not create fake profile cards.
- Do not add legal/registration/audit/governance claims.

DATA MODEL

Create or extend a shared content source, e.g.:
src/content/team.js

Suggested shape:

```
{
  id,
  slug,
  name,
  role,
  departmentOrArea,
  category,
  shortBio,
  biography,
  image,
  imageAlt,
  location,
  socialLinks,
  order,
  featured,
  status
}
```

Use approved records only.

INTEGRATION

- Add a Team link from the existing About experience where appropriate.
- Reuse shared components and visual patterns already present.
- Do not change the existing Mission & Vision, Values, How We Work, Transparency, Work, Impact, Get Involved or Stories content except for necessary linking.
- Do not add team content to the homepage unless an existing shared architecture makes it trivial and the approved data is present.

DESIGN

- Use the existing RBB brand system.
- Deep Trust Blue: #10437C
- Bright Sky Blue: #00ADEF
- Light Gray: #F5F7FA
- White: #FFFFFF
- Charcoal: #3A3A3A
- Growth Green: #5CB85C
- Satoshi with Arial fallback.
- Responsive mobile/tablet/desktop.
- Reuse PageHeader, SectionHeading, Button, ClosingCta and established card/layout components where suitable.

ACCESSIBILITY

- Semantic heading hierarchy.
- Keyboard accessible links/buttons.
- Visible focus states.
- Correct image alt handling.
- No layout shift from images.
- Respect reduced motion.
- Maintain existing contrast standards.

VALIDATION

After implementation:

1. Run production build.
2. Test /about/team on desktop and mobile widths.
3. Confirm no horizontal overflow.
4. Confirm no console errors.
5. Confirm unknown/empty team data does not crash the page.
6. Confirm draft/pending-review records do not render.
7. Confirm existing routes are not broken.
8. Confirm navigation links work.
9. Confirm no fake staff content appears anywhere in production.

DELIVERABLE

Report:

- files created/modified
- route behavior
- data model
- empty-state behavior
- integration changes
- tests/build results
- any issues or decisions that need RBB approval

Do not commit or stage changes unless explicitly requested.

11. Implementation Approval Checklist

- ✓ /about/team exists and renders correctly.
- ✓ Team content is driven by a shared data source.
- ✓ Only approved records can render.
- ✓ Empty state is intentional and trustworthy.
- ✓ No invented team members or organizational claims.
- ✓ Existing About and site navigation remain intact.
- ✓ Responsive layout verified.
- ✓ Accessibility verified.
- ✓ Production build passes.
- ✓ No console errors.
- ✓ No horizontal overflow.

✓ No fake forms, fake social links or fake profile data.

Next document after approval: continue the master-specification sequence with the next unbuilt site capability. Do not begin that phase until the Document 10 implementation has been reviewed and approved.
