

Rising Beyond Borders

Website Specification — Document 01

INFORMATION ARCHITECTURE & NAVIGATION

This document defines the first layer of the website: what pages exist, how they are grouped, what belongs in the main navigation, and how visitors should move through the organization's story.

Brand basis

The supplied brand guidelines establish Deep Trust Blue, Bright Sky Blue, Growth Green, Light Gray, White and Charcoal as the core visual palette, with Satoshi as the primary typeface. The logo concept communicates unity, compassion, collaboration, hope and growth.

Organizational basis

The supplied annual report describes Rising Beyond Borders as a non-profit focused on empowering communities and creating sustainable solutions. It identifies four program areas: Education, Health & Wellbeing, Livelihoods, and Community Support.

Important: This document separates confirmed source material from proposed website structure. Where the supplied materials do not provide a fact, this specification does not invent one.

1. Website Goals

The website should guide visitors through a clear sequence: understand the organization, discover its work, see evidence of impact, build trust, and choose a way to participate.

Goal	Website requirement
Understand	Explain who Rising Beyond Borders is, why it exists, and what it stands for.
Discover	Make programs, projects and geographic work easy to explore.
Trust	Present impact, leadership, financial information and reports clearly.
Participate	Provide clear paths for donors, volunteers, partners and other supporters.
Stay current	Create a scalable Stories / News area for ongoing updates.

2. Recommended Main Navigation

Use a compact primary navigation. Mission, Team, Financials and Contact should not consume separate top-level navigation slots when they can be logically grouped.

Main item	Type	Children / destination
About Us	Dropdown	Who We Are; Mission & Vision; Our Values; Our Team; Transparency
Our Work	Dropdown	Education; Health & Wellbeing; Livelihoods; Community Support; All Projects
Our Impact	Dropdown	Impact at a Glance; Where We Work; Our Approach; Impact Stories
Get Involved	Dropdown	Donate; Volunteer; Partner With Us; Fundraise
Stories	Direct link	Stories / News hub
Donate	Primary CTA	Dedicated donation page

3. V1 Sitemap

The following is the recommended first production sitemap.

HOME — Primary entry point and overview.

ABOUT US — Who We Are • Mission & Vision • Our Values • Our Team • Transparency & Financials

OUR WORK — Education • Health & Wellbeing • Livelihoods • Community Support • All Projects

OUR IMPACT — Impact at a Glance • Where We Work • Our Approach • Impact Stories

GET INVOLVED — Donate • Volunteer • Partner With Us • Fundraise

STORIES — News & Updates • Field Stories • Impact • Community • Reports

CONTACT — Contact form and verified organization contact details.

DONATE — Dedicated donation flow.

4. Page Responsibility

Page	Primary question answered	Primary CTA
------	---------------------------	-------------

Home	Who are you, what do you do, and how can I help?	Donate / Explore Our Work
About Us	Who is Rising Beyond Borders?	Learn More / Get Involved
Our Work	What problems and program areas do you work on?	Explore a Program
Program page	What does this program actually do?	Explore Projects / Support
Project page	What happened here and what changed?	Support This Work
Impact	What has the organization achieved?	Read Stories / Get Involved
Get Involved	How can I participate?	Choose an Action
Stories	What is happening now?	Read Story
Donate	How can I financially support the work?	Donate
Contact	How can I reach the organization?	Send Message

5. Audience Model

The website should support several audiences without creating separate versions of the site.

Audience	What they need to find quickly
Donors	Impact, projects, financial transparency, donation process and reports.
Volunteers	Volunteer opportunities, expectations, application/contact path and current work.
Partners	Program areas, geographic reach, impact, collaboration opportunities and contact.
Communities / prospective beneficiaries	Programs, locations, support information and a way to contact RBB.
General visitors	About, mission, work, impact, stories and team.

6. Homepage Role

The homepage should not try to contain every detail. It should create a clear narrative and send visitors to deeper pages.

- 01 Hero — Building Hope. Creating Change. Transforming Lives.
- 02 Impact strip — verified headline metrics only.
- 03 Why We Exist — concise organizational introduction.
- 04 Our Work — four established program areas.
- 05 Our Work on the Ground — selected verified projects.
- 06 Our Approach — how RBB works with communities and partners.
- 07 Impact — metrics, geography and evidence.
- 08 Impact Stories — human-centered stories.
- 09 Get Involved — Donate, Volunteer, Partner, Fundraise.
- 10 Transparency — reports, financial information and governance.
- 11 Stories / News — latest updates.
- 12 Final CTA — a concise invitation to participate.
- 13 Footer — navigation, contact, social, legal and accessibility links.

7. Content Rules for the Build

Use these rules while implementing the pages:

- Do not invent impact statistics, project details, countries, addresses, registration details or financial claims.
- Keep the four program areas from the supplied materials unless the organization approves a change.
- Use real project names, locations, outcomes and photography supplied or approved by RBB.
- Use varied calls to action; not every section should say Donate Now.
- Keep the tone human, hopeful, inclusive and respectful. Avoid presenting communities only through suffering.
- Build content as reusable data where possible so Programs, Projects, Stories and Team can become CMS-driven.
- The website should be usable by visitors on mobile, tablet and desktop.

8. Source-Verified Items vs. Items Requiring Confirmation

Item	Status
Mission	Provided in annual report.
Vision	Provided in annual report.
Four program areas	Provided in annual report.
50K+ lives impacted	Provided in annual report; verify before publication.
25 countries reached	Provided in annual report; country list not supplied.
200+ partners & donors	Provided in annual report; verify before publication.
120+ impact metric	Appears in supplied report but uses the same 'Lives Impacted' label as 50K+; must be clarified.
2026 financial percentages	Provided in annual report; confirm that these are approved/current website figures.
Beverly Hills, CA address	Appears in supplied presentation; must be reconciled with the stated Canada-based positioning before publication.
Project cards shown in current design	Require organization verification and complete project data before publication.

9. Claude Code Implementation Prompt

Attach this PDF to Claude Code and use the following prompt. The prompt intentionally asks Claude to implement structure without inventing missing organization data.

You are working on the Rising Beyond Borders NGO website. I have attached the website specification PDF for Document 01: Information Architecture & Navigation. I have also provided the existing project/codebase and the organization's brand assets. TASK: Implement ONLY the information-architecture/navigation changes described in the attached specification. Do not redesign the entire website and do not invent NGO facts.

1. First inspect the existing codebase and identify: - current routing setup - current header/navigation - existing homepage sections - reusable layout/components - styling system - content/data structure - current mobile navigation
2. Compare the current implementation with the attached specification.
3. Implement: - the recommended top-level navigation: About Us Our Work Our Impact Get Involved Stories Donate - dropdown/grouping structure described in the PDF - a scalable route structure for the V1 sitemap - active navigation states - responsive desktop/mobile navigation - a prominent Donate CTA - reusable page/layout structure so future pages can be added without duplication
4. Preserve the existing Rising Beyond Borders visual identity: - Deep Trust Blue: #10437C - Bright Sky Blue: #00ADEB - Growth Green: #5CB85C - Light Gray: #F5F7FA - White: #FFFFFF - Charcoal: #3A3A3A - Satoshi as the preferred typeface, with the existing project fallback if Satoshi is not already configured.
5. IMPORTANT CONTENT RULE: Do NOT invent: - impact numbers - countries - project details - addresses - charity registration details - financial information - team members - beneficiary stories Where a page is not yet ready, create a clean placeholder structure using neutral labels such as "Content to be provided by Rising Beyond Borders" rather than fabricated copy.
6. Do not remove good existing sections simply because the sitemap changes. Reorganize them where appropriate.
7. Keep the existing project architecture and coding conventions unless there is a clear reason to improve them.
8. Make the implementation production-quality: - responsive - accessible - semantic HTML - keyboard navigable - proper focus states - mobile menu support - no console errors - no broken routes - reusable components - clean TypeScript where applicable
9. Before finishing, verify: - every navigation item has a valid route - dropdowns work on desktop - mobile navigation works - Donate CTA is visually prominent - existing homepage still renders - no existing functionality is unnecessarily broken Do not move on to major new page content or visual redesign yet. This task is specifically to establish the website's information architecture and navigation foundation.

10. Approval Checklist

Before moving to Document 02, confirm:

- Main navigation structure is approved.
- Dropdown groupings are approved.
- V1 sitemap is approved.
- Donate is confirmed as the primary header CTA.
- The organization has confirmed which content is available now versus later.
- The current project cards and metrics are not treated as verified until RBB confirms them.
