

Rising Beyond Borders

Document 06 — Get Involved Master Specification

Purpose: Define the complete Get Involved experience while keeping operational, donation, volunteer, partnership and fundraising details explicitly subject to RBB approval.

Primary route: /get-involved

Related routes: /get-involved/donate, /get-involved/volunteer, /get-involved/partner, /get-involved/fundraise

Status: Master specification for Claude Code implementation

Phase rule: Build the architecture and reusable content model now. Do not invent operational details or activate payment/lead-processing functionality without verified RBB requirements.

1. Document Objective

Get Involved should turn visitor interest into clear next steps: donate, volunteer, partner or fundraise. The experience must explain each pathway without inventing eligibility rules, contact details, payment methods, application processes, tax claims or program commitments.

The site should make the next action obvious while remaining honest about which operational details RBB has not yet supplied.

Core rule: A complete interface may contain a clear pending-information state. Do not fill missing NGO operations with generic assumptions.

2. Information Architecture

Route	Purpose	Current content posture
/get-involved	Gateway to the four participation paths.	Build complete structure; use approved/proposed distinctions.
/get-involved/donate	Explain giving and provide the approved donation action.	Payment/RBB approval pending RBB.
/get-involved/volunteer	Explain volunteering and provide the approved route to participate.	Requirements/process/contact pending RBB.
/get-involved/partner	Explain partnership opportunities and provide an approved partnership type.	Partnership types/process/contact pending RBB.
/get-involved/fundraise	Explain fundraising as a participation path.	Model/process/rules pending RBB.

3. /get-involved — Master Page

Section order:

01 — Hero

A concise invitation to take action with RBB.

02 — Four Ways to Get Involved

Donate, Volunteer, Partner With Us and Fundraise as the primary paths.

03 — Choose Your Path

Short explanations and clear links to each dedicated page.

04 — Why Get Involved

Use only approved RBB positioning. Avoid unsupported claims about outcomes, scale or urgency.

05 — Related Work

Connect participation to Our Work and Our Impact.

06 — Questions / Contact

Use only an RBB-approved contact route; otherwise show a pending-information state.

07 — Closing CTA

A final action prompt, without duplicating unsupported donation mechanics.

Four primary paths

- **Donate:** Give financial support.
- **Volunteer:** Give time and skills.
- **Partner With Us:** Explore organizational/community partnership.
- **Fundraise:** Raise support for RBB.

These four pathway labels are already established in the website architecture. Their detailed operational descriptions require RBB approval.

4. Donate — /get-involved/donate

Recommended section order

- Hero / invitation to give.
- Why Give / RBB-approved rationale.
- How Your Support Helps — only approved examples or clearly marked placeholder.
- Donation Options — only real RBB-approved options.
- Donation Process — only when the actual process is supplied.
- Frequently Asked Questions — only verified answers.
- Trust / Transparency — connect to existing transparency content without inventing registrations, audits or tax claims.
- Closing CTA.

Critical: Do not activate a real payment flow, claim tax deductibility, state a currency, invent suggested amounts, promise allocation percentages, or name a payment processor unless RBB provides and approves those details.

The existing inherited donation widget contains provisional CA\$ amounts. Those values must remain non-production/provisional and must not be presented as final RBB donation options in this phase.

Donation data model

Use a future-ready model such as:

```
donation = {
  status,
  intro,
  options: [{ id, label, amount, currency, description, status }],
  paymentMethods: [{ label, provider, url, status }],
  faqs: [{ question, answer, status }],
  trustLinks: [{ label, url }]
}
```

5. Volunteer — /get-involved/volunteer

Recommended section order

- Hero / invitation.
- Why Volunteer — approved RBB language only.

- Ways to Volunteer — only verified roles/types.
- Who Can Volunteer — only verified eligibility.
- What to Expect — only verified process.
- Volunteer Inquiry / Application — only after the real process is supplied.
- FAQ — verified answers only.
- Closing CTA.

Do not invent age requirements, screening, time commitments, locations, training, background checks, application steps, response times or volunteer testimonials.

6. Partner With Us — /get-involved/partner

Recommended section order

- Hero / partnership invitation.
- Why Partner — approved RBB positioning.
- Potential Partnership Areas — placeholders until RBB defines them.
- Who Can Partner — only verified categories.
- How Partnership Works — only approved process.
- Partnership Inquiry — real approved contact/form route only.
- FAQ / Next Steps.
- Closing CTA.

Do not invent corporate partnership packages, sponsorship tiers, named partners, benefits, pricing, CSR claims or partnership outcomes.

7. Fundraise — /get-involved/fundraise

Recommended section order

- Hero / invitation to fundraise.
- Why Fundraise — approved language only.
- How It Works — placeholder until RBB supplies the process.
- Fundraising Ideas — only if RBB approves examples.
- Rules / Guidelines — only if RBB provides them.
- Start a Fundraiser — only after a real process is defined.
- FAQ.
- Closing CTA.

Do not invent fundraising platforms, campaign rules, approval requirements, minimum targets, payment handling or legal/tax guidance.

8. Shared Get Involved Data Model

Create one shared source for the four paths so cards, navigation and dedicated pages do not drift.

```
getInvolved = {
  paths: [{ id, title, slug, shortDescription, icon, ctaLabel, status }],
```

```
contact: { label, url, status },
sharedTrustLinks: [],
sharedFaqs: []
}
```

Use **verified**, **pending-review** and **placeholder** status internally where useful. Do not display internal editorial statuses unless intentionally designed for an editorial interface.

9. Existing Routes & Legacy Compatibility

- The primary public participation architecture is now /get-involved and its four child routes.
- Existing /donate should remain functional and should be reconciled with the new donation architecture rather than creating two competing donation experiences.
- Legacy /giving, /giving/zakat and /gifts remain outside the main navigation as established earlier.
- Do not remove legacy routes without checking existing links and redirect requirements.
- Do not expand or redesign Zakat content in this phase; the existing approved placeholder state remains the source of truth.

10. Content Governance

Can be used structurally

- Donate, Volunteer, Partner With Us and Fundraise as the four participation pathways.
- The general idea of giving time, skills, partnership and fundraising, subject to final RBB wording.
- Links to Our Work, Our Impact and existing Transparency architecture.

Must not be invented

- Donation amounts, currencies or payment processors.
- Tax-deductibility claims.
- Bank/payment details.
- Volunteer eligibility, locations, schedules or screening.
- Partnership packages, named partners or sponsorship benefits.
- Fundraising rules, targets, platforms or approval processes.
- Contact information not supplied/approved by RBB.
- Testimonials or participant stories.
- Claims about how a specific donation amount produces a specific outcome.

11. UI / Design Direction

- Continue the established RBB design system and components.
- Use clear pathway cards/rows with strong hierarchy and accessible names.
- Make primary actions obvious without using manipulative urgency.
- Use Growth Green for approved primary CTA treatments where consistent with the existing system.
- Do not create fake counters, donor walls, progress bars or urgency timers.
- Use editorial layouts and existing spacing/type patterns rather than introducing a new visual system.

12. Accessibility & Responsive Requirements

- One H1 per page and logical H2/H3 structure.
- Keyboard-accessible pathway cards and forms.
- Visible focus indicators.
- Form fields, if any, must have labels and useful validation.
- No colour-only status or error communication.
- Respect reduced-motion settings.
- No horizontal overflow at 320, 375, 768, 1024, 1280 and 1440px.
- Donation/payment UI must not imply a live transaction if no real payment process is connected.

13. SEO & Metadata

- Give each Get Involved page a unique title and meta description.
- Do not put unsupported donation, tax, impact or operational claims into metadata.
- Use descriptive headings and meaningful link text.
- Ensure legacy redirects, if used, do not create duplicate canonical experiences.

14. Implementation Constraints

- Implement Document 06 only.
- Do not redesign Homepage, About Us, Our Work or Our Impact.
- Reuse existing components and design tokens.
- Do not add a CMS/admin system.
- Do not connect a payment gateway.
- Do not create a fake contact form that appears to submit to RBB.
- Do not invent operational content to make pages appear complete.
- Keep content data-driven and ready for later RBB-approved enrichment.
- Do not start Document 07.

15. Claude Code Implementation Prompt

Attach this PDF to Claude Code and run the following prompt:

```
Implement Document 06 – Get Involved Master Specification for Rising Beyond Borders.
```

```
Treat this PDF as the authoritative specification for the Get Involved phase.
```

```
ROUTES
```

```
Build:
```

```
- /get-involved  
- /get-involved/donate  
- /get-involved/volunteer  
- /get-involved/partner  
- /get-involved/fundraise
```

```
Also reconcile the existing /donate route so there is no confusing duplicate donation experience. Preserve established legacy routes unless a safe redirect is required.
```

GOAL

Create a complete, professional participation architecture while avoiding invented RBB operational details.

FOUR PATHS

- Donate
- Volunteer
- Partner With Us
- Fundraise

SHARED DATA

Create one shared Get Involved data source for pathway cards and pages. Use explicit internal content statuses where useful: verified, pending-review, placeholder.

DONATE

Build the full page structure, but DO NOT:

- connect a payment gateway
- invent payment providers
- invent bank details
- invent currencies or final donation amounts
- claim tax deductibility
- promise specific outcomes from specific donation amounts
- publish the inherited provisional CA\$ amounts as final RBB options

VOLUNTEER

Do not invent:

- eligibility
- age requirements
- locations
- schedules
- screening/background checks
- training
- application process
- response times
- testimonials

PARTNER

Do not invent:

- partnership packages
- sponsorship tiers
- named partners
- pricing
- benefits
- CSR claims
- partnership outcomes
- inquiry/contact details

FUNDRAISE

Do not invent:

- fundraising platforms
- rules
- targets
- approval process
- legal/tax guidance
- payment handling

CONTACT

Use an approved RBB contact route if one exists. Otherwise show a clear pending-information state. Do not restore inherited third-party contact details.

LEGACY

Keep the established /giving, /giving/zakat and /gifts routes outside the main navigation. Do not expand Zakat in this phase.

DESIGN

Use the existing RBB system:

Deep Trust Blue #10437C

Bright Sky Blue #00ADEF

Light Gray #F5F7FA

White #FFFFFF
Charcoal #3A3A3A
Growth Green #5CB85C
Satoshi typography

ACCESSIBILITY

One H1, logical headings, visible focus, accessible names, labelled forms, no colour-only meaning, reduced-motion support.

RESPONSIVE QA

Test 320, 375, 768, 1024, 1280 and 1440px. No horizontal overflow.

VALIDATION

- production build passes
- no console errors/warnings
- no invented/inherited NGO content
- no third-party contact details
- no live payment claims unless a real approved payment system already exists
- no temporary test data
- all new routes load directly
- all internal links work
- legacy routes remain functional

IMPORTANT

Do not redesign previous phases.
Do not start Document 07.
Do not add a CMS/admin.
Do not commit changes.

After implementation return a concise report covering:

1. routes changed
2. sections created
3. data/content files created or modified
4. components reused
5. components created
6. content requiring RBB approval
7. donation/payment handling
8. legacy route handling
9. build result
10. responsive result
11. accessibility result
12. console result
13. scans for invented/inherited claims
14. remaining issues/decisions.

16. Approval Checklist

- All five primary Get Involved routes exist and load directly.
- The four paths share a consistent data/content model.
- Donate does not present provisional CA\$ amounts as final.
- No payment gateway or fake transaction flow was added.
- No tax-deductibility or legal claims were invented.
- Volunteer requirements and processes remain placeholders where RBB has not supplied them.
- Partner packages and processes remain placeholders where RBB has not supplied them.
- Fundraising rules/process remain placeholders where RBB has not supplied them.
- Existing legacy routes remain safe.
- No inherited third-party contact information was restored.
- Build, responsive, accessibility and console checks pass.

- No temporary test data remains.

17. RBB Content Required After Implementation

- Approved donation process, payment method/provider, currency and final suggested amounts if desired.
- Donation FAQ and any approved tax/legal wording.
- Volunteer roles, eligibility, process, locations and application/contact method.
- Partnership categories, process and inquiry route.
- Fundraising model, rules, process and approved materials.
- Approved contact information or form destination.
- Approved testimonials/stories, if any.

18. Phase Boundary

Document 06 establishes the participation architecture and safe implementation foundation. It does not activate real donation processing or invent operational procedures. Those should be added only after RBB supplies and approves the required information.

Next phase after approval: Document 07 should be defined only after the Document 06 implementation report has been reviewed.
