

Rising Beyond Borders

Document 08 — Contact & Organization Master Specification

Purpose: Define the public contact, careers and organization-information architecture while keeping all operational contact details and submission workflows subject to RBB approval.

Primary route: /contact

Related route: /about-us/careers (legacy/placeholder), plus organization and footer contact surfaces.

Status: Master specification for Claude Code implementation

1. Document Objective

Contact is the point where visitors should be able to understand how to reach Rising Beyond Borders and, when RBB provides an operational destination, submit an inquiry. The page must not imply that a message was delivered, an application was received or a response will occur unless a real approved service supports that behavior.

This phase also establishes a clean architecture for careers and contact information so the same source can power the Contact page, footer and future organizational surfaces.

Core rule: Never invent contact details and never simulate a successful submission.

2. Current Information Boundary

The supplied RBB materials establish the organization's general positioning, mission, vision, programs and website domain, but they do **not** provide a verified public phone number, email address, physical office address, careers process, inquiry destination or form backend.

- Do not restore any contact information inherited from third-party NGO content.
- Do not infer an office address from the website domain.
- Do not invent an email such as info@... unless RBB explicitly supplies it.
- Do not claim a form is operational until a real destination/service is connected and tested.
- Do not invent response times, office hours or departments.

3. Information Architecture

Area	Purpose	Implementation posture
/contact	Primary public contact hub.	Build complete structure with approved/pending states.
Contact methods	Email/phone/address/social/contact routes if supplied.	Empty/pending until RBB supplies verified details.
General inquiry	Question/inquiry pathway.	Architecture only; no fake submission.
Careers	Employment/opportunity information.	Placeholder until RBB supplies an approved careers process.
Footer contact	Consistent organization contact surface.	Consume shared contact data.
Newsletter	Subscription pathway.	Pending until a real provider/process exists.

4. /contact — Page Structure

01 — Hero

Clear invitation for visitors who need to reach RBB.

02 — Contact Methods

Verified email, phone, address or other approved channels; otherwise a clear pending state.

03 — General Inquiries

Explain the inquiry purpose and provide an actual approved route when available.

04 — Get Involved

Link to Donate, Volunteer, Partner With Us and Fundraise without duplicating their full content.

05 — Careers

Short introduction and link to the careers experience; placeholder if no careers information exists.

06 — Newsletter / Updates

Explicit pending state unless a real provider is connected.

07 — Transparency & Reports

Link to approved transparency/report resources.

08 — Closing CTA

Relevant next step such as Our Work, Impact or Get Involved.

5. Contact Data Model

Create one shared source of truth for public organization contact information.

```
contact = {
  status,
  intro,
  methods: [{ id, type, label, value, href, description, status }],
  generalInquiry: { title, description, href, status },
  office: { address, city, region, country, mapUrl, status },
  social: [{ platform, label, url, status }],
  hours: { value, status },
  responseTime: { value, status }
}
```

Only fields with verified values should render as operational contact information.

6. Contact Methods

Email

Render only a verified RBB email address. Use a mailto link only when the address is confirmed.

Phone

Render only a verified public RBB phone number. Do not copy phone numbers from inherited/third-party content.

Physical address

Render only an address supplied and approved by RBB. If an address is eventually supplied, an optional map link may be added; do not infer coordinates or office locations.

Social channels

Use only official RBB accounts supplied/approved by RBB. Do not create social links from assumptions.

Office hours / response times

Do not display these unless RBB supplies them.

7. General Inquiry / Contact Form

The architecture may support a future contact form, but the implementation must not create a form that appears to send information if there is no real receiving service.

When a real form is eventually approved, its minimum requirements should include:

- Named receiving destination/service.
- Approved fields and purpose for each field.
- Clear consent/privacy language where required.
- Accessible labels and validation.
- Server-side or service-side validation.
- Spam/abuse protection appropriate to the selected service.
- A real success state only after confirmed submission.
- A real failure state when submission fails.
- No collection of unnecessary sensitive personal information.

For this phase, a pending-state contact panel is preferred if no real inquiry destination exists.

8. Careers

The current site contains a placeholder route at **/about-us/careers**. Document 08 should reconcile this with the organization's current information architecture without inventing jobs or an application process.

Recommended future structure

- Careers Hero
- Why Work With RBB — approved organizational wording only
- Open Opportunities — empty state until real roles are supplied
- How to Apply — only after an approved process exists
- General Careers Contact — only if supplied
- Closing CTA

Do not publish invented job titles, locations, salary ranges, eligibility requirements, application deadlines, hiring contacts or employment benefits.

9. Careers Route Decision

Keep the existing legacy path **/about-us/careers** functional for compatibility. If a new canonical careers route is introduced later, establish a deliberate redirect rather than leaving two competing careers pages.

Do not add Careers to the main navigation in this phase unless the site's approved navigation architecture is explicitly updated.

10. Footer & Global Contact Consistency

- Footer contact information must consume the shared contact source.
- The footer must not contain hard-coded third-party contact details.
- If no verified contact method exists, use a restrained organization/contact placeholder rather than fake details.

- Donate, Get Involved and Contact links must use their canonical current routes.
- Social links should appear only when verified.

11. Newsletter Boundary

Document 07 removed misleading newsletter forms. Keep that behavior.

- Do not add a newsletter form in Document 08.
- Use an explicit pending state until RBB approves a provider, destination and privacy/consent process.
- Do not show a fake 'Thanks — you're on the list' state.
- If a future provider is added, test the real subscription flow before publishing success messaging.

12. Content Governance

Allowed

- RBB's supplied mission/vision and general organizational positioning.
- Links to existing About, Our Work, Impact, Get Involved and Transparency pages.
- Explicit placeholders stating that contact/careers information is to be provided and reviewed by RBB.

Must not be invented

- Email addresses, phone numbers or physical addresses.
- Office hours or response times.
- Careers/jobs.
- Application procedures.
- Contact form recipients.
- Social accounts.
- Legal/registration information.
- Tax or donation support contacts.
- Third-party NGO contact details.

13. Design & UX Direction

- Continue the RBB visual system: Deep Trust Blue #10437C, Bright Sky Blue #00ADEF, Light Gray #F5F7FA, White #FFFFFF, Charcoal #3A3A3A and Growth Green #5CB85C.
- Continue Satoshi typography.
- Make contact methods visually distinct without creating false prominence for unavailable methods.
- Pending states should look intentional and professional.
- Do not use a map as decorative filler when no verified office location exists.
- Do not use stock contact imagery as a substitute for missing organizational information.

14. Accessibility & Responsive Requirements

- One H1 per page and logical H2/H3 hierarchy.
- All contact links must have clear accessible names.

- Future forms must use real labels, errors and focus management.
- No colour-only status communication.
- Keyboard-accessible links and controls.
- Respect reduced motion.
- No horizontal overflow at 320, 375, 768, 1024, 1280 and 1440px.

15. SEO & Metadata

- Create unique metadata for Contact and Careers if the page is implemented.
- Do not put unverified contact information into metadata.
- Use descriptive titles and descriptions.
- Do not claim local presence or office locations without verified information.

16. Implementation Constraints

- Implement Document 08 only.
- Do not redesign previous phases.
- Do not invent contact or careers information.
- Do not connect an email provider, CRM, form backend or newsletter service.
- Do not create a fake contact form.
- Do not add a CMS/admin.
- Preserve legacy compatibility.
- Do not start Document 09.

17. Claude Code Implementation Prompt

Attach this PDF to Claude Code and run the following prompt:

Implement Document 08 – Contact & Organization Master Specification for Rising Beyond Borders.

Treat this PDF as the authoritative specification for the Contact/Organization phase.

GOAL

Build a complete Contact architecture and reconcile the existing Careers placeholder without inventing operational information.

ROUTES

- /contact
 - keep /about-us/careers functional as an existing legacy/placeholder route
- Do not create a competing careers experience unless needed to reconcile the current route.

CONTACT DATA

Create a shared contact data source containing:

- methods
- general inquiry
- office/address
- social channels
- hours
- response time

Use internal status values where useful: verified, pending-review, placeholder.

IMPORTANT

The supplied RBB materials do NOT provide verified public phone, email, office address, careers process, contact recipient or form backend.

Therefore DO NOT invent:

- email addresses
- phone numbers
- office addresses
- map locations
- social accounts
- office hours
- response times
- careers/jobs
- hiring contacts
- form recipients
- legal/registration details

Do not restore third-party NGO contact information from earlier site content.

CONTACT FORM

Do not connect a backend or external service.

Do not create a form that appears to submit successfully.

Use a clear pending contact/inquiry state until RBB provides a real destination.

CAREERS

Keep /about-us/careers functional. If it is a placeholder, make it intentional and clear. Do not invent job listings, application requirements, salary, benefits, locations or deadlines.

NEWSLETTER

Do not reintroduce newsletter forms. Keep the explicit pending state established in Document 07.

FOOTER

Make global contact surfaces consume the shared contact data. Do not hard-code unverified contact information.

DESIGN

Use:

Deep Trust Blue #10437C

Bright Sky Blue #00ADEF

Light Gray #F5F7FA

White #FFFFFF

Charcoal #3A3A3A

Growth Green #5CB85C

Satoshi typography

ACCESSIBILITY

One H1, logical headings, keyboard access, visible focus, accessible link names, reduced-motion support, no colour-only meaning.

RESPONSIVE QA

Test 320, 375, 768, 1024, 1280 and 1440px. No horizontal overflow.

VALIDATION

- production build passes
- no console errors/warnings
- no invented/inherited contact details
- no third-party NGO contact content
- no fake form success states
- no fake careers data
- all routes load directly
- all internal links work
- no temporary test data

IMPORTANT

Do not redesign previous phases.

Do not connect email/CRM/newsletter/form services.

Do not add a CMS/admin.

Do not start Document 09.

Do not commit changes.

After implementation return a concise report covering:

1. routes changed
2. sections created
3. contact/careers data files created or modified
4. components reused
5. components created
6. verified vs pending contact content
7. form handling
8. careers handling
9. newsletter handling
10. legacy route handling
11. build result
12. responsive result
13. accessibility result
14. console result
15. scans for invented/inherited contact content
16. remaining issues/decisions.

18. Approval Checklist

- /contact is a complete intentional page.
- Contact methods come from one shared data source.
- No unverified email, phone, address or social account appears.
- No fake contact form or success message exists.
- Careers placeholder is intentional and compatible with the existing route.
- No invented jobs or hiring requirements exist.
- Newsletter remains a pending state.
- Footer/global contact surfaces are consistent.
- Legacy routes remain functional.
- Build, responsive, accessibility and console checks pass.
- No temporary test data remains.

19. RBB Content Required After Implementation

- Approved public email address(es).
- Approved public phone number(s), if any.
- Approved office/mailling address, if any.
- Approved social accounts.
- Office hours and response expectations, if RBB wants them displayed.
- General inquiry destination.
- Approved contact form fields/process, if desired.
- Careers information and application process.
- Newsletter provider/process, if desired.

20. Phase Boundary

Document 08 establishes a trustworthy public contact and organization-information foundation. It intentionally does not connect external communication infrastructure or invent missing operational details.

Next phase after approval: Document 09 should be defined only after the Document 08 implementation report has been reviewed.
