

RISING BEYOND BORDERS

Document 11 — Donation & Giving Experience
Master Specification + Claude Code Implementation Prompt

Status: Implementation specification

Purpose: Define the public donation/giving experience and its content architecture while keeping all payment, financial, tax, banking and processing details strictly dependent on information supplied and approved by Rising Beyond Borders.

1. Scope & Current Constraints

The existing Information Architecture establishes **/get-involved/donate** as the canonical donation page and **/donate** as a redirect. Legacy giving routes also exist: **/giving**, **/giving/zakat**, **/gifts** and **/giving/major-giving**. Document 06 intentionally avoided inventing payment providers, currencies, donation amounts, bank details, tax claims or operational processes. This document formalizes how those areas should behave until RBB supplies verified giving information.

2. Canonical Routes

Route	Role
/get-involved/donate	Canonical public donation page
/donate	Redirect to canonical donation page
/giving	Legacy giving route; preserve compatibility
/giving/zakat	Legacy informational route; retain until RBB confirms its purpose/content
/gifts	Legacy giving/gifts route; preserve compatibility
/giving/major-giving	Legacy major-giving route; preserve compatibility

3. Canonical Donation Page Structure

3.1 Hero

Clear donation invitation using approved RBB messaging. Do not promise a particular outcome per donation unless RBB supplies approved impact language.

3.2 Why Give

Explain why support matters using the approved mission, program areas and verified impact information already established in the site content.

3.3 How Support Helps

Connect giving to Education, Health & Wellbeing, Livelihoods and Community Support. Avoid invented cost-per-outcome claims.

3.4 Ways to Give

Display only methods actually provided and approved by RBB. Examples such as card, bank transfer, cheque or other methods must not appear unless supplied by RBB.

3.5 Donation Action

A real payment flow may be integrated later. Until a provider and production configuration are approved, the page must use a clear pending state rather than a fake payment form.

3.6 Transparency & Trust

Link to /about/transparency and relevant approved financial/reporting information. Do not add unsupported audit, registration, tax-deductibility or compliance claims.

3.7 FAQ

Use only questions and answers supported by RBB. Do not invent refund, receipt, tax, recurring-payment, cancellation or processing policies.

3.8 Related Ways to Help

Link to Volunteer, Partner With Us and Fundraise using the existing Get Involved architecture.

3.9 Closing CTA

Reuse the established site-wide CTA.

4. Donation Data Model

Recommended shared source: src/content/donation.js

Suggested model:

status, hero, whyGive, supportAreas, givingMethods, donationAction, faqs, trustLinks, relatedPaths, closingCta.

For any giving method: id, label, description, status, instructions, externalUrl, provider, availability. Only **approved** methods may render. Payment provider details must be supplied by RBB and verified before publication.

5. Payment & Financial Safety Rules

- Do not invent or expose a payment provider.
- Do not invent production payment URLs, merchant IDs, account numbers, UPI IDs, bank details or wallet details.
- Do not publish donation amounts or suggested amounts unless RBB approves them.
- Do not publish currency labels unless RBB confirms the intended donation currency/currencies.
- Do not claim that donations are tax-deductible or eligible for a specific tax benefit without approved legal/tax wording.
- Do not claim that donation receipts are automatically issued unless the actual process is supplied.
- Do not build a fake payment form that appears to accept real donations.
- If payment integration is not ready, make the state unmistakably informational/pending rather than simulating a transaction.
- Never log or display payment credentials or sensitive donor information in client-side source.

6. Donation Amounts & Impact Claims

The current approved site source does not provide a verified donation-amount schedule or costed impact model. Therefore the initial implementation must not claim statements such as “■X feeds a family” or “\$X provides Y”. The existing 2026 financial overview of 78% Programs & Services, 12% Fundraising and 10% Administration remains a transparency figure pending RBB verification and should not be repurposed as a donation-impact claim.

7. Zakat & Legacy Giving Pages

The legacy **/giving/zakat** route must not be expanded with religious guidance, eligibility rules, nisab calculations, recipient categories, payment instructions or Shariah claims unless RBB explicitly supplies and approves that content. The organization has not been established in the current source set as a Muslim-based organization. Likewise, **/giving**, **/gifts** and **/giving/major-giving** should preserve their route compatibility without introducing unsupported giving programs.

8. Donation State Model

State	Public behavior
pending	Explain that donation details/payment options are being finalized; no fake action.
approved-informational	Show approved giving information without payment processing.
approved-live	Show the real approved payment action only after provider/configuration verification.

9. UX / Accessibility

- Use the established RBB visual system and existing shared components.
- Make the primary donation action visually clear without using manipulative urgency.
- Use plain-language labels and explanatory copy.
- Do not use misleading countdowns, pressure language or fabricated scarcity.
- Ensure keyboard navigation, visible focus, semantic headings, accessible form labels when forms exist, sufficient contrast and reduced-motion support.
- On mobile, the donation action should remain easy to locate without obstructing content.

10. Integration

- Get Involved hub links to **/get-involved/donate**.
- Header Donate CTA points to **/get-involved/donate**.
- Homepage involvement CTA continues to use the shared Donate path.
- Transparency links point to **/about/transparency**.
- Volunteer, Partner and Fundraise use existing shared routes.
- Do not duplicate donation content across pages; use one shared donation data source.

11. Claude Code Implementation Prompt

You are implementing Document 11 – Donation & Giving Experience for the Rising Beyond Borders website.

CONTEXT

- Documents 01-10 are implemented and approved.
- RBB is an inclusive NGO; do not introduce religious positioning unless explicitly supplied and approved.
- /get-involved/donate is the canonical donation route.
- /donate redirects to it.
- Legacy routes /giving, /giving/zakat, /gifts and /giving/major-giving must remain compatible.
- No verified payment provider, donation amounts, bank details, currencies, tax wording or live donation configuration has been supplied.

GOAL

Build a production-quality donation page architecture that is ready for verified giving information without inventing financial or payment details.

ROUTES

- /get-involved/donate – canonical
- /donate – redirect
- preserve legacy giving routes

PAGE

1. Hero
2. Why Give
3. How Support Helps
4. Ways to Give
5. Donation Action
6. Transparency & Trust
7. FAQ
8. Related Ways to Help
9. Closing CTA

DATA

Create/reuse src/content/donation.js.

Suggested:

```
{
  status,
  hero,
  whyGive,
  supportAreas,
  givingMethods,
  donationAction,
  faqs,
  trustLinks,
  relatedPaths,
  closingCta
}
```

Only approved content may render publicly.

CRITICAL FINANCIAL RULES

- Do not invent a payment provider.
- Do not invent payment URLs, bank details, UPI IDs, merchant IDs or account information.
- Do not invent donation amounts or currencies.
- Do not make tax-deductibility, receipt, refund or compliance claims without approved RBB wording.
- Do not build a fake payment form.
- If live payment is not configured, show a clear informational/pending state.
- Do not expose sensitive donor/payment data in client-side code.

DONATION AMOUNTS

The current source set contains no verified donation amount schedule or cost-per-outcome model. Do not add one.

TRANSPARENCY

Link to /about/transparency. The 2026 78% / 12% / 10% figures are pending RBB verification and must not be presented as independently verified or as donation-impact claims.

ZAKAT / LEGACY ROUTES

Do not add Zakat calculations, religious guidance, eligibility rules or Shariah claims unless explicitly supplied and approved by RBB. Preserve existing legacy routes without inventing content.

DESIGN

Use existing RBB components and brand system:

- Deep Trust Blue #10437C
- Bright Sky Blue #00ADEF
- Light Gray #F5F7FA
- White #FFFFFF
- Charcoal #3A3A3A
- Growth Green #5CB85C
- Satoshi / Arial fallback

UX

- Clear primary donation action.
- No manipulative urgency, fake scarcity or fabricated countdowns.
- Responsive at all existing breakpoints.
- Accessible keyboard/focus/heading/form behavior.
- Reduced motion supported.

INTEGRATION

- Header Donate CTA -> /get-involved/donate
- Get Involved -> /get-involved/donate
- Homepage donation CTA uses shared route/data
- Transparency -> /about/transparency
- Volunteer / Partner / Fundraise use existing routes
- Avoid duplicated donation content.

VALIDATION

1. Production build passes with no warnings.
2. Test /get-involved/donate at 320, 375, 768, 1024, 1280 and 1440px.
3. No horizontal overflow.
4. No console errors/warnings.
5. No fake financial/payment data appears.
6. Legacy routes still resolve.
7. Donation pending state is clear.
8. Existing pages/routes remain intact.
9. Accessibility checks pass.
10. Scan production content for unsupported payment, tax, currency and amount claims.

Do not commit or stage changes unless explicitly requested.

REPORT

Return:

- files created/modified
- route behavior
- donation data model
- current public state
- legacy-route behavior
- build/responsive/accessibility results
- any RBB approval decisions required.

12. Approval Checklist

- ✓ Canonical donation route remains /get-involved/donate.
- ✓ No unsupported payment provider or payment details.
- ✓ No unsupported amounts or currencies.
- ✓ No unsupported tax/receipt/compliance claims.
- ✓ No fake payment form.
- ✓ Transparency link works.
- ✓ Legacy giving routes remain compatible.
- ✓ Zakat route remains free of invented religious guidance.
- ✓ Shared donation data source is used.
- ✓ Responsive/accessibility/build/console checks pass.
- ✓ No unrelated earlier-phase regressions.

Important: This document establishes the website architecture. It does not authorize live donation processing. A future payment-integration phase should only begin after RBB supplies and approves the provider, currencies, payment methods, legal/tax wording, donation amounts (if any), receipt/refund policy and production credentials/configuration.
