

RISING BEYOND BORDERS

Document 13 — Privacy, Legal & Site Policies
Master Specification + Claude Code Implementation Prompt

Status: Implementation specification

Purpose: Establish the website architecture for privacy, legal and policy information so the interaction system from Document 12 has a clear place for approved policies, without inventing legal language, jurisdictional claims, registration facts, cookie practices, retention periods or compliance certifications.

1. Why This Phase

The current website has a placeholder Privacy route, while the new form architecture explicitly requires an approved privacy policy before newsletter or consent-dependent forms can be activated. This phase creates the policy information architecture and safe publication rules. It is not a substitute for legal review.

2. Policy Routes

Route	Purpose / status
/privacy	Canonical Privacy Policy route; currently requires approved RBB policy content.
/terms	Terms / Website Terms architecture if RBB wants a public terms page.
/cookies	Cookie information architecture only if the website actually uses cookies or similar technologies that require disclosure.
/accessibility	Accessibility statement architecture if RBB chooses to publish one.

3. Policy Publication Model

Create one shared policy-content source rather than scattering legal copy through components. Suggested source: **src/content/policies.js**.

- Each policy has id, route, title, status, effectiveDate, lastUpdated, sections, contactReference and optional relatedPolicies.
- Only approved policy records render as final public policy content.
- Draft or pending-review content must not be presented as an active legal policy.
- If no approved policy exists, show a neutral pending state rather than fabricated legal text.
- Policy dates must come from RBB; do not infer an effective date from the website deployment date.

4. Privacy Policy Content Architecture

4.1 Introduction

RBB-approved explanation of the policy's purpose and scope.

4.2 Information Collected

Only describe categories of information RBB actually collects through the website and approved services.

4.3 How Information Is Used

Only approved purposes; do not infer marketing, analytics, fundraising or operational uses.

4.4 Sharing / Service Providers

Name or describe third parties only when RBB confirms them and the policy is approved.

4.5 Forms & Communications

Must align with the actual form/newsletter implementation from Document 12.

4.6 Cookies & Similar Technologies

Only document technologies actually used and confirmed by RBB.

4.7 Data Retention

Never invent a retention period.

4.8 Security

Use approved factual wording. Do not promise absolute security.

4.9 Individual Rights / Choices

Use legally reviewed RBB wording appropriate to the organization's actual obligations.

4.10 International Transfers

Only include if relevant and confirmed by RBB/legal review.

4.11 Contact / Privacy Questions

Use a verified RBB contact method only.

4.12 Updates to the Policy

Explain the approved process for policy updates and dates.

5. Terms / Website Terms

If RBB wants a Terms page, provide the structure only until approved legal content is supplied. Potential sections may include acceptable use, intellectual property, external links, website availability, disclaimers, limitation of liability, governing law and changes. These are structural headings only—not authorization to publish those legal provisions.

6. Cookie Policy / Technology Disclosure

- Do not create a cookie policy simply because the route exists.
- First identify actual cookies, local storage, analytics, embedded services and third-party technologies used in production.
- Do not claim that the site uses no cookies unless this has been verified.
- Do not invent consent-banner behavior.
- If a future consent mechanism is introduced, its configuration must match the approved privacy/cookie policy.

7. Accessibility Statement

A future Accessibility page may describe RBB's approved accessibility commitment, known limitations, contact route and update process. Do not claim a particular legal accessibility standard, certification or complete conformance level unless RBB verifies and approves that claim.

8. Legal / Organizational Claims That Must Remain Unverified

- Charity registration number or registration status.
- CRA registration or tax-receipt eligibility.
- Specific jurisdiction of incorporation or legal domicile.
- Tax-deductibility statements.
- Auditor or audit status.
- Certification or accreditation.
- Board/legal governance claims.
- Specific privacy-law applicability.
- Specific data-protection certifications.
- Guaranteed security, privacy or uptime claims.

9. Relationship to Document 12 Forms

The form system must remain disabled where an approved privacy policy or required consent configuration is missing. Once RBB supplies an approved privacy policy, Document 12 can reference its canonical route. Newsletter activation additionally requires approved consent wording, provider configuration and unsubscribe/confirmation behavior.

10. Footer & Navigation

- Add policy links only for pages that actually exist and are approved for publication.
- Do not add a large legal-navigation block filled with placeholder links.
- Privacy should become a real footer link once approved.
- Terms, Cookies and Accessibility should appear only when RBB chooses to publish those pages.
- Do not remove existing Transparency links.

11. Claude Code Implementation Prompt

You are implementing Document 13 – Privacy, Legal & Site Policies for the Rising Beyond Borders website.

CONTEXT

- Documents 01-12 are implemented and approved.
- /privacy currently requires approved content.
- Document 12 forms remain disabled until RBB supplies submission configuration and privacy/consent requirements.
- RBB has not supplied legal policy text in the current source set.

GOAL

Create a safe, reusable policy architecture without inventing legal wording or organizational facts.

ROUTES

- /privacy – canonical Privacy Policy route
- /terms – Terms architecture if appropriate
- /cookies – only if actual cookie/technology usage warrants a public policy
- /accessibility – optional accessibility statement architecture

DATA

Create/reuse src/content/policies.js.

Suggested model:

```
{
  id,
  route,
  title,
  status,
  effectiveDate,
  lastUpdated,
  sections,
  contactReference,
  relatedPolicies
}
```

Only approved policy records may render as final policy content.

EMPTY/PENDING STATE

If no approved policy exists, show:

"Privacy policy information will be provided and reviewed by Rising Beyond Borders."

Do not fabricate legal copy.

PRIVACY CONTENT

When RBB supplies approved text, support:

- introduction/scope
- information collected
- use
- sharing/service providers
- forms and communications
- cookies/technologies
- retention
- security
- rights/choices
- international transfers if applicable
- privacy contact
- policy updates

Do not invent any of these facts now.

LEGAL SAFETY

Do not invent:

- CRA registration
- charity/tax status
- tax deductibility
- registration numbers
- jurisdiction/incorporation
- audit status
- certifications
- legal-law applicability
- data-retention periods
- privacy rights claims
- cookie behavior
- security guarantees
- governing law

COOKIES

Do not publish a cookie policy unless actual production technology is verified. Do not invent a consent banner.

TERMS

If a /terms route is implemented, use a pending state or structure only. Do not publish legal provisions without approved RBB/legal content.

ACCESSIBILITY

An /accessibility route may use a pending state. Do not claim WCAG/legal conformance or certification without approval.

FORMS INTEGRATION

- Document 12 forms must remain disabled when required privacy/consent configuration is missing.
- Once /privacy is approved, forms may link to it through shared policy data.
- Newsletter still requires consent, provider, confirmation and unsubscribe configuration.

FOOTER

Only expose links to approved/public policy pages. Avoid placeholder legal links.

DESIGN

Reuse the existing RBB components and brand system. Maintain responsive behavior, accessibility and reduced-motion support.

VALIDATION

1. Production build passes with no warnings.
2. /privacy works.
3. Any /terms, /cookies or /accessibility route is intentional and does not contain invented legal claims.
4. No fake policy dates.
5. No invented contact information.
6. Form behavior remains unchanged/disabled where required.
7. Footer links only point to intentional routes.
8. No console errors/warnings.
9. No horizontal overflow.
10. Existing 01-12 routes remain intact.

Do not commit or stage changes unless explicitly requested.

REPORT

Return:

- files created/modified
- policy routes
- pending/approved behavior
- footer changes
- forms integration behavior
- build/responsive/accessibility results
- any RBB/legal approval decisions required.

12. Approval Checklist

- ✓ /privacy has a canonical route and safe pending/approved model.
- ✓ No fabricated legal or privacy wording.
- ✓ No invented policy dates.
- ✓ No unsupported registration/tax/CRA claims.
- ✓ No invented cookie behavior.
- ✓ Terms/Cookies/Accessibility routes are intentional and safe.
- ✓ Footer only links to appropriate policy routes.
- ✓ Document 12 form activation remains dependent on approved privacy/consent configuration.
- ✓ Responsive/accessibility/build/console checks pass.
- ✓ Existing approved routes remain intact.

Important: This phase establishes the website's policy architecture. It is not legal advice and does not create or approve legal terms. RBB should supply or have counsel review the actual policy text before publication and before consent-dependent forms are activated.
